## ABOUT

Logan grew up in Tampa with a desire to play in a band like her older brother. However, she always wanted to forge her own path, and since he played guitar, she opted for the bass guitar, setting off on her musical journey. She demonstrated a natural talent for it right from the start and was even bestowed the title of "Blues Kid of America" in 2014, performing with an upright bass at the Chicago Blues Festival. Renowned for her ability to play complex bass lines while simultaneously singing, she has never shied away from a challenge.

## THE DETAILS

- ① Logan was raised in Tampa, where her mom was a college professor, her dad was a 30-year military veteran, and her brother played in a band. Logan, full of energy, was a rambunctious tomboy who always joined the boys in playing football. Despite her active nature, she gravitated towards music and admired her brother's performances on stage, aspiring to do the same one day.
- ② Initially, Logan's dream was to compete in the Olympics in track & field. Unfortunately, her aspirations were shattered in college after she broke her left ankle seven times. Undeterred, Logan persisted in running until she was advised to stop, a determination she also applies to her musical pursuits.
- ③ Logan earned a degree in neuroscience and worked in hospitals in St. Petersburg until her brother convinced her to relocate to Nashville to pursue music.
- ④ One of her most challenging moments in music was discovering she had vocal nodules. Logan feared she might never sing again, but today she is nodules-free and appreciates every opportunity to sing, recognizing how swiftly it can be taken away.
- ⑤ Logan's primary passion is the bass guitar, and she spends four hours every night playing at Kid Rock's Bar in Nashville. She chose the bass because her brother played guitar, and she wanted to carve her own path.
- ⑥ Leading her own band, Logan's voice is often compared to Janis Joplin's. Despite the exhausting schedule of performing six days a week, she couldn't imagine pursuing any other career. Logan is determined to demonstrate that hard work pays off on *The One & Only*.
